

Lacrosse America's top priority is to provide a safe and competitive environment for all of our teams. While the impact of COVID-19 continues to evolve, we are eager to return to a sense of normalcy and competition. With that, we are excited to announce our revised plan for the LA 2020 Summer Series!

We understand most teams' original schedules will need to shift. In the hopes of helping as many teams as we can, we have opened registration for all of our Summer events, including those that were previously sold out. We hope this allows everyone the flexibility to adjust their schedules in this unprecedented time.

If you are currently registered for an event that is no longer taking place, you may switch to any other Lacrosse America event - please email for details and assistance info@lacrosseamerica.com.

The Lacrosse America experience is fueled by our unique intersection between lacrosse and technology, enabling our event expectations to stay very high. These event schedule decisions will continue to be influenced by CDC requirements while maintaining event integrity. Event-specific rules and formats will be updated based upon the host state's individual guidelines. Some updated strategies may include:

- Social distancing protocols where applicable
- Additional cleanliness measures
- Modifications in the number or length of games per day
- Game Format
- Multiple event sites
- Spectator limitations
- Limiting common areas such as vendor village and headquarters

In addition to the added safety measures and LA technology at each event, we are excited to **announce the introduction of Artificial Intelligence Video Technology to the Summer Series**. This new technology will be able to film select games so players and teams can share the footage with college coaches and remote spectators. Any recorded game will be available to those teams and players to view and download on demand at no additional cost.

If you have any additional questions, please reach out to us at (847) 412-5529 or info@lacrosseamerica.com.

Sincerely,

Nicole Bingham
