8' 6" Radius

A

B   B

E   E

15 Ft

47' 9" (from D to E)   D   34' 10" (from D)

40' 3" (from A to C going through B)

34' 10" (from D to G)

34' 10" (from D to C)

C   C

13' 2"

G

Start at D. Put in a nail and dash out the circle. Make clear dashes at both B's and the A. Move the nail to A.

Measure out to C through the dash you made at B. Mark 40' 3" then dash a line back to B. Use the measuring tape to guide you in .

Do the same on the other side.

Move the nail back to D. Measure out to C 34' 10."
Dash your arc from there to the other C mark you made.

Walk the tape to E 47 '9". Go make the inward hash at 34'10" and the dot 15' off the line.

Dash the arc from one E all the way over to the other E. Go make the inward hash at 34' 10" and the dot 15' off the line.

Start at G with a hash, then work left. 13' 2" between each. Last one on each side should be "floating."
